3. COMPOSITION/INFORM	ATION ON INGREDIENTS
Substance or Mixture	: Mixture
Chemical Description	: Lubricating oil.
Component Information	: Lubricant base oil 80-90%
•	Additives 10-20%
Chemical Formula	: Not possible to define.
CAS registry number	: Trade secret
Additional Information	: If product contained highly refined mineral oil, it contains <3% DMSO-extract,
	according to IP346.

4. FIRST AID MEASURES	
General Information	: Not expected to be a health hazard when used under normal conditions.
Inhalation	: Remove casualty to fresh air and keep at rest in a position comfortable for breathing.
	Cover with blanket to keep warm and rest in a quiet surrounding. Seek immediate
	medical advice and attention.
Skin Contact	: Wash skin with large amount of water using soap.
Eye Contact	: Rinse cautiously with clean water for several minutes. Remove contact lenses, if
Lye Contact	present and easy to do, and continue rinsing. After rinsing for a minimum of 15
Inception	minutes, seek medical advice and attention.
Ingestion	: Without inducing vomiting, call a doctor for treatment. If mouth has been dirtied, clean
	with water.
Most Important	: If swallowed, may irritate mucous membrane of stomach and induce vomiting.
Symptoms/Effects, Acute	Inhalation if mist may cause feeling ill. Skin contact and eye contact may cause
& Delayed	irritation.
Immodiate Medical	: Treat symptomatically. Call a doctor or poison control center for guidance.
Immediate Medical	
Attention, Special Treatment	

## **5. FIRE FIGHTING MEASURES**

Clear fire area of all non-emergency personnel.		
Suitable Extinguishing Media	: Concentrated strong liquid in mist and powder forms, carbon dioxide and foam. Use powder and carbon dioxide may be used small fires only. Effective to use foam to	

	shutdown the air in a large fires.
Unsuitable Extinguishing Media	: Do not use water in a jet.
Specific Hazards Arising from Chemicals	: Hazardous combustion products may include: A complex mixture of airborne solid and liquid particulates and gases (smoke). Carbon monoxide. Unidentified organic and inorganic compounds
Fire fighting instructions	: Water the surrounding equipment to cool them down. Cordon off the affected place and its vicinity to all, except the concerned parties.
Protective Equipment & Precautions for Fighters	: Ensure to wear protective equipment and approach from windward.

## 6. ACCIDENTAL RELEASE MEASURES

Avoid contact with spilled or	released material. For guidance on selection of personal protective equipment see
	ection 13 for information on disposal. Observe the relevant local and international
Personal Precautions,	: Avoid contact with skin and eyes. Prepare suitable equipment and materials.
Protective Equipment and	
Emergency Procedures	
Environmental	: Use appropriate containment to avoid environmental contamination. Prevent from
Precautions	spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers. In event of entering in the sea, extend oil fences to prevent from spreading, and sop up with absorbent materials. Use chemicals and/or detergents, they must satisfy technical standards as set by the Ministry of Land, Infrastructure and Transport / Ministry of the Environment.
Methods and Material for	: Promptly remove all ignition sources and stop leakages. In a small leakage, absorb
Containment and Clean	and recover by use of soil, sand, sawdust and waste clothes. In a large leakage,
Up	cordon off the danger zone, prevent from entering and enclose it with sand bank and
•	stop outflow. Cover liquid surface with foam, and recover liquid into containers.
Additional Advice	: Local authorities should be advised if significant spillages cannot be contained.
7. HANDLING AND STORAG HANDLING	ЭЕ
Technical Measures	: In handling this material over the allocated volume, ensure approval to meet requires of the laws. Keep away from heat, sparks, open flames, hot objects. No smoking. Take measures against static discharge. Ensure to wear clothing and shoes made of conductive materials. When fixing or processing machine, it carries out after removing dangerous objects completely. NEVER suck up (siphoning) this material by mouth. Wear suitable protect equipment if skin or eye contact may cause. Seal containers hermetically without handling in violent such as falling, dropping, or jolting.
Ventilation Precautions	: see Section 8
Precautions for Safe	: Use under normal temperature. Prevent from mixing water and impurity. Avoid contact
Handling	with halogens, strong acids, alkali and oxidizing materials.
STRAGE	

Conditions for Safe Storage	: Keep containers tightly closed and in a cool, well-ventilated place away from direct sunlight. It is recommended to lock up storage area. Use properly labelled and closeable containers. Avoid heat, sparks, open flame and static accumulation.
Technical Measures	: All electrical appliances shall be explosion-proof types, and they all must be earthed.
Precautions for Safe	: Avoid contact and storage in same place with halogens, strong acids, alkali and
Stroage	oxidizing materials.
Recommended Materials	: Storage in original containers. Do not pressurize empty containers. May cause rupture. Do not weld, heat up, drill or cut containers. May ignite the residue and cause explosion.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

### **12. ECOLOGICAL INFORMATION**

**Basis for Assessment** Ecotoxicological data have not been determined specifically for this product. Information given is based on a knowledge of the components and the ecotoxicology of similar products.

Caution Toxicity	Unless indicated otherwise, the data presented is representative of the main component of a whole product, rather than for individual component(s). Individual components contained above cut-off value is described on Section 3.: Poorly soluble mixture. May cause physical fouling of aquatic organisms.: Fish: Aquatic Invertebrates: Algae: Microorganisms: Microorganisms	
Acute Aquatic Toxicity	: Not expected to be a hazard.	
Chronic Aquatic Toxicity	: Not expected to be a hazard.	
Mobility	: Lubricating oil components have estimated log Koc >3, indicating these components are likely to be adsorbed onto soil and sediment and are not likely to leach to ground water.	
Persistence/degradability	: Expected to be not readily biodegradable. Major constituents are expected to be inherently biodegradable.	
Bioaccumulative Potential	: Not expected to be a hazard. It may contains components with the potential to bioaccumulate. <sup>(3)</sup>	
Hazardous to ozone layer	: Not classified because this product not contained substances listed on Montreal Protocol and Ozone Layer Protection Law.	
13. DISPOSAL CONSIDERA	TIONS	
Material Disposal	1 Waste disposal yourself or entrust the industrial waste treatment company who obtained the prefectural governor's permission or municipal corporation. Disposal should be in accordance with applicable regional, national, and local laws and regulations.
